3D Group

Press Release

July 15, 2016

Matawan, New Jersey, July 15, 2016: 3D Group - a full service construction company located in Matawan, New Jersey - recently announced the award and start of Coralmay plaza in East Brunswick, New Jersey.

3DG was retained by the owner after previously completing a renovation on the site for a furniture store. Phase 2 of the project will consist of a new retail building, 3-story office building, and an addition to the already completed furniture store. 3DG helped the owner layout the site, in addition to designing and budgeting each building, to ensure that the project comes in at their intended budget.

This project is complicated, as the site work needs to occur in phases allowing the current furniture store to stay open. Due to soil conditions, the rear building and the 18 foot high retaining wall will need to sit on Geo-piers in order to meet the bearing capacity needed. The front retail building has already been leased to a sports bar with an outside seating area. The rear 3-story office building, with a roof top terrace, will be the future home of the owner.

Brain Michalski will serve as Project Manager and Dan DeSandolo will serve as Estimator/Purchaser. The project broke ground in June of 2016 and has an 18 month build out timeline.
